

Structured Investments in Action Part II: Risk-Managed Growth Potential

How and why structured investments are used within a portfolio to pursue growth objectives.

May 2023

Structured investments have evolved a lot over the last few decades, with increasingly flexible ways to tailor a portfolio to the needs of investors looking for either income or growth.

HOW AND WHY STRUCTURED INVESTMENTS ARE USED WITHIN A PORTFOLIO TO PURSUE GROWTH OBJECTIVES.

Growth-oriented structured investments are typically used to achieve consistent market exposure, with embedded protective features that can provide a degree of risk management in a portfolio. Other times, and still on the growth side of the portfolio, structured investments can be used to try to capitalize on a specific market outlook (bullish or bearish) or to gain efficient, risk-tailored exposure to strategies that may be difficult to access directly.

Growth investors considering any structured investment should do the following:

- View structured investments as buy-and-hold strategies whose payouts are not promised until maturity.
- Understand there is no guaranteed secondary market and that while issuers have historically bought back structured investments, they are under no legal obligation to do so.
- Be comfortable with the issuer's creditworthiness since payments made by structured investments are subject to the credit risk of the issuer.

What do growth-oriented solutions look like in the structured investment world? A high-level overview can shed some light:

Growth solutions:

- Enable investors to participate in the potential growth of a desired market, often with some risk mitigation.
- Are generally characterized by a single payment at maturity.
- Are tied to the return of an underlier, such as an equity index, a basket of indices or a stock.
- Can offer full principal protection, partial protection, or no protection at all.

Structured investment products and services may be offered through SIMON Markets LLC ("SIMON") and/or Axio Financial LLC (Axio). SIMON and Axio are each a registered broker/dealer, member FINRA and SIPC, and are affiliated with iCapital, Inc. and its subsidiaries. Please see the disclaimer at the end of this document for more information about these entities.

Highlighted below are a few hypothetical scenarios to show structured investments can be used to achieve growth objectives.

GROWTH USE CASE #1: INTERNATIONAL EXPOSURE, WITH A DEGREE OF PROTECTION

The objective: An investor seeks the potential growth and diversification that may come with international equity exposure. She is optimistic about emerging markets specifically, and comfortable with equity risk. However, she would appreciate some downside protection should those markets experience a slight to moderate decline.

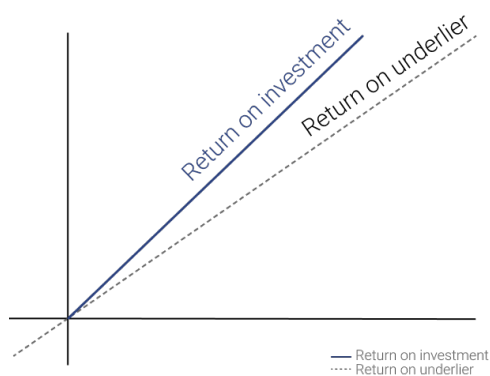

A potential solution: A market linked growth note with upside participation tied to a broad emerging market equity index, along with barrier protection.

This type of note can be visualized in the below hypothetical illustration:

Underlier: MSCI Emerging Markets Index

Term: 4 years

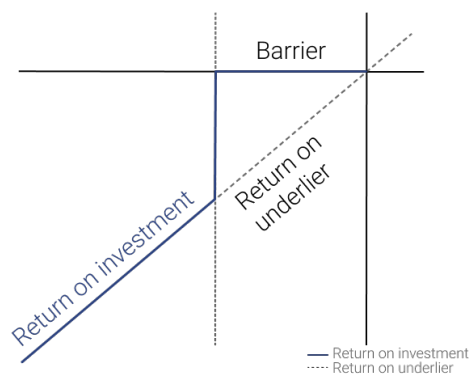

Payment details: 1.5x upside participation

For illustrative purposes only

At maturity, an investor would receive a return that is 1.5x any gains in the index, uncapped, on a price return basis.

Protection details: 20% barrier (observed at maturity)

For illustrative purposes only

At maturity, the barrier would absorb the first 20% of any losses in the index but after that, protection would disappear, and losses would be one-to-one from the index's initial level.

In other words, if the index is at 80% or above of its initial level at maturity, an investor would receive his or her full principal back. However, if the index is below 80% of its initial level at maturity, an investor would take losses from the index's initial level.

Benefits:

- Leveraged and uncapped participation in any gains in the underlier at maturity.
- Return of principal, so long as the underlier has not declined below the barrier at maturity.

Considerations:

- The potential for losses that are one-to-one from the underlier's initial level should the underlier close below the barrier level at maturity; losses could be significant.
- The underlier's return is based on price return only and does not include dividends.

Structured investment products and services may be offered through SIMON Markets LLC ("SIMON") and/or Axio Financial LLC (Axio). SIMON and Axio are each a registered broker/dealer, member FINRA and SIPC, and are affiliated with iCapital, Inc. and its subsidiaries. Please see the disclaimer at the end of this document for more information about these entities.

EXAMPLE #2: EXPRESSING AN INVESTMENT VIEW

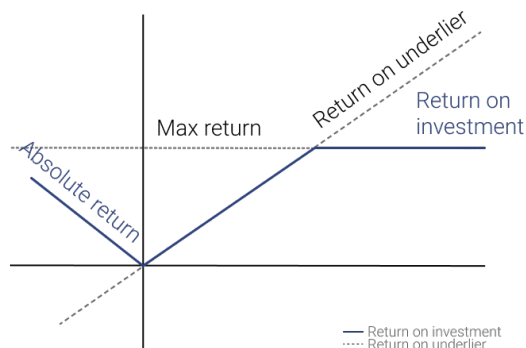

The objective: An investor follows the market closely and feels that over the coming 18 months U.S. equity returns may be more muted, or even slightly negative (he expects single-digit returns, either positive or negative). He wants to remain engaged in the markets, but also somewhat protected if market gains do not continue.

A potential solution: A market linked growth note that offers exposure to U.S. equities with the potential for a return regardless of whether market performance is positive or negative, and a degree of protection against a market decline.

Underlier: S&P 500 Index

Term: 18 months

Payment details: 1x upside participation
(to 15% max return) 1x absolute return (to 10% hard buffer)

For illustrative purposes only

At maturity if the underlier has increased, an investor would participate in any gains in the underlier up to a pre-determined maximum return of 15%.

If the underlier has declined but is at or above 90% of its initial level, an investor would receive an absolute return payment in the amount of the decline.

Benefits:

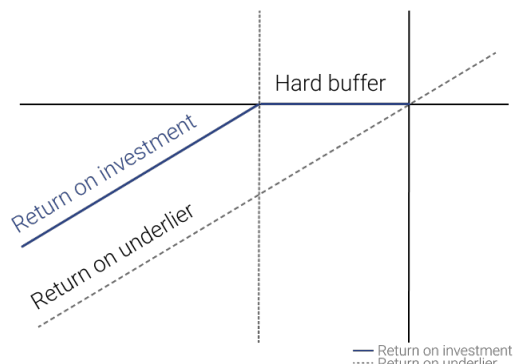

- Upside participation (up to a cap) in any gains in the underlier.
- Payment even if the underlier return is negative, as long as negative return is not below the hard buffer level at maturity.

INFORMED INVESTING

Structured investments come in a wide variety with different terms and conditions. There's one for almost any market outlook or investment goal, giving investors the chance to stay in the market and choose how much protection they need to feel comfortable.

Structured investment products and services may be offered through SIMON Markets LLC ("SIMON") and/or Axio Financial LLC (Axio). SIMON and Axio are each a registered broker/dealer, member FINRA and SIPC, and are affiliated with iCapital, Inc. and its subsidiaries. Please see the disclaimer at the end of this document for more information about these entities.

Protection details: 10% hard buffer
(observed at maturity)

For illustrative purposes only

At maturity, the barrier would absorb the first 20% of any losses in the index but after that, protection would disappear, and losses would be one-to-one from the index's initial level.

In other words, if the index is at 80% or above of its initial level at maturity, an investor would receive his or her full principal back. However, if the index is below 80% of its initial level at maturity, an investor would take losses from the index's initial level.

Considerations:

- The hard buffer only protects principal against a degree of decline in the underlier; losses could be significant.
- The underlier's return is based on price return only and does not include dividends.

When considering any structured investment, investors should understand the type of protection it offers, if any, as well as its payout potential, by carefully reviewing the offering documents before investing.

IMPORTANT INFORMATION – DISCLAIMER

STRUCTURED INVESTMENTS ARE CONSIDERED COMPLEX PRODUCTS AND MAY NOT BE SUITABLE FOR ALL INVESTORS.

This material is intended as general background information, for educational purposes only, and this material should not be used as a primary basis to make an investment decision. The material provides a general overview of the products described, and actual financial instruments may differ materially from those described. No person should consider investing in an instrument on the basis of these materials. Any investment decision should be made only after carefully reviewing the applicable prospectus. Please remember that all instruments described in this material involve a risk of loss. This does not constitute legal, accounting or tax advice, and the recipient should consult with his or her legal, accounting or tax adviser regarding the instruments described in this material.

This material is for informational purposes only and is not to be construed as a recommendation or an offer or solicitation to buy or sell any security, financial product or instrument, or otherwise to participate in any particular trading strategy. In providing information on hypothetical, generic structured investments, neither SIMON Markets LLC nor Axio Financial LLC is recommending a specific security, or recommending investing a certain percentage of a portfolio to one structured investment. Before investing in any product, an investor should review the prospectus or other offering documents, which contain important information, including the product's investment objectives or goals, its strategies for achieving those goals, the principal risks of investing in the product, the product's fees and expenses, and its past performance.

Please note that there is no public secondary market for structured investments. Although the issuer may from time to time make a market in certain structured investments, the issuer does not have any obligation to do so and market making may be discontinued at any time. Accordingly, an investor must be prepared to hold such investments until maturity. Any or all payments are subject to the creditworthiness of the issuer. SIMON Markets LLC operates a platform that makes available offerings of structured investments and annuities to financial professionals. In operating this technology platform, SIMON Markets LLC earns

revenue based on the volume of transactions that take place in these products and would benefit by an increase in sales for these products. Issuers of structured investments pay Axio Financial LLC fees based on the size of transactions.

This material may not, without the prior written consent of SIMON Markets LLC or Axio Financial LLC, be (i) copied, photocopied, or duplicated in any form, by any means, or (ii) distributed to any person that is not an employee, officer, director, or authorized agent of the recipient. Neither SIMON Markets nor Axio Financial shall have any liability, contingent or otherwise, to the user or to third parties, for the quality, accuracy, timeliness, continued availability, or completeness or to update any data contained in this material nor for any special, indirect, incidental or consequential damages which may be incurred or experienced because of the use of the data made available herein, even if SIMON Markets or Axio Financial has been advised of the possibility of such damages. This material was not prepared with a view to public disclosure or to conform with any disclosure standards under any state, federal or international securities laws or other laws, rules or regulations, and neither SIMON Markets LLC nor Axio Financial LLC take any responsibility for the use of the information in this material.

Structured investment products and services may be offered through SIMON Markets LLC and/or Axio Financial LLC, each a registered broker/dealer, member FINRA and SIPC, and subsidiary of iCapital, Inc. ("iCapital"). iCapital affiliates include Institutional Capital Network, Inc., iCapital Securities, LLC, and iCapital Advisors, LLC. iCapital Securities, LLC, a registered broker/dealer, member FINRA and SIPC, offers alternative investment products and services. iCapital Advisors, LLC is an investment adviser registered with the SEC. The referenced registrations and memberships in no way imply that the SEC, FINRA or SIPC have endorsed the entities, products or services discussed herein. iCapital and iCapital Network are registered trademarks of Institutional Capital Network, Inc.
