There is no guarantee that any investment will achieve its objectives, generate profits or avoid losses. Diversification does not ensure profit or protect against loss in a positive or declining market. The performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data shown above. Investment return and principal value will fluctuate, so that units, when sold, may be worth more or less than their original cost. The Fund's performance is net of certain fees and expenses. See the Fund's prospectus for a comprehensive explanation of the Fund's fees and expenses. The returns reflect any expense limitation and reimbursement agreement in place at the time, without which, the performance in certain periods would have been lower or higher. The Fund's performance, especially for short periods of time, should not be the sole factor in making your investment decision. Volatility is measured by the standard deviation of the Fund's net returns. Performance of the Underlying Funds presented in this presentation was not obtained by iCapital.

The indices shown herein are provided solely as an indication of the performance of various capital markets and/or alternative investment strategies in general and are provided for the purpose of making general market data available as a point of reference only. Such indices may not be available for direct investment, may be unmanaged, assume reinvestment of income, do not reflect the impact of any trading commissions and costs, management or performance fees, and have limitations when used for comparison or other purposes because they, among other reasons, may have different trading strategy, volatility, credit or other material characteristics. No representation is made that any benchmark or index is an appropriate measure for comparison. Therefore, investors should not consider any index to be a performance benchmark for iDHF (or the Underlying Funds), nor should investors conclude that iDHF will or will not be correlated with an index. The volatility and risk profile of the indices presented herein are likely to be materially different from that of iDHF. In addition, the indices employ different investment guidelines and criteria than iDHF and do not necessarily employ leverage. As a result, the holdings in iDHF and the liquidity of such holdings may differ significantly from the securities that comprise the indices. A summary of the investment guidelines for the indices presented is available upon request of iDHF.

This contractual arrangement will remain in effect for at least one year from the effective date of the Fund's registration statement on Form N-2 unless the Fund's Board of Managers approves its earlier termination.

INVESTORS SHOULD CAREFULLY CONSIDER THE INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES OF THE FUND BEFORE INVESTING. THIS AND OTHER IMPORTANT INFORMATION ABOUT THE FUND IS CONTAINED IN THE FUND'S PROSPECTUS, WHICH CAN BE OBTAINED BY CALLING IDHF AT 833.446.5656. THE PROSPECTUS SHOULD BE READ CAREFULLY BEFORE INVESTING.

RISKS ASSOCIATED WITH AN INVESTMENT IN THE FUND

The discussion of the various risks is not intended to be a complete enumeration or explanation of the risks involved in an investment in the Fund. The Fund should be considered a speculative investment and involves a high degree of risk and may involve loss of capital, up to the entire amount of a member's investment.

The nature of private equity can result in a lack of transparency due to limited information, and the risk of loss is increased due to speculative strategies employed by the Fund, including investing assets in hedge funds, private equity, private credit, early stage and other private investments which may not perform as expected. More importantly, Fund and underlying fund shares or units, as applicable, will not be listed on any national securities exchange and are subject to restrictions on transferability, thereby making them illiquid.

Other risks include, but are not limited to, market risk, concentration risk, and potentially less diversification due to the substantial portion of Fund assets invested in manager-specific hedge funds. The Fund is also subject to the risks of leverage, higher fees and additional layers of expenses, as well as the potential for greater volatility due to Fund assets invested in a limited number of securities, or a focus on particular sectors and geographical regions.

Assets invested in foreign securities exposes the Fund to various geopolitical risks and currency fluctuations typically not applicable in the U.S., and this risk is magnified for emerging markets. The potential for adverse changes in business and tax laws involves tax risk and heightened regulatory scrutiny. The lack of a secondary market for trading hedge funds subjects the Fund to liquidity risks and may result in greater price risk and potential for inaccuracies in determining fair market value of investments held in the portfolio. Investments acquired in reliance on imperfect information increases counterparty risk and liabilities, and anticipated value may not be realized.

The indexes shown are for general market comparisons and are not meant to represent any actual fund. An index is unmanaged and not available for direct investment. Standard deviation is a statistical measure of how consistent returns are over time; a lower standard deviation indicates historically less volatility.

The performance data referenced herein represents past performance. Past performance is no guarantee of future results. Please consult a tax advisor for specifics on how an investment in the Fund may impact particular tax situations. Neither iCapital, nor the Fund renders tax advice to clients.
