END NOTES

All performance, assets under management, number of employees/investment professionals, offices, and active investments are as of September 30, 2025, unless otherwise stated.

1. References herein to the “Fund” refer to the iDirect Private Credit Fund, unless specified otherwise. The Fund intends to allocate at least 80% of its assets into private credit investments sourced by, or sponsored, or managed by Audax, Bain, and/or Charlesbank. There is no guarantee the Fund will achieve its investment objectives. Diversification does not ensure profit or protect against loss in a positive or declining market and past performance is no guarantee of future results. Data as of September 30, 2025. Financial metrics are reflective of the most recent financial metrics provided by each underlying company.
2. Includes allocations to the Audax and Bain BDCs. Data as of September 30, 2025.
3. By underlying investment value. Totals may not add up to 100% due to rounding. Unfunded commitments are not included in the calculations. Data as of September 30, 2025.
4. Portfolio Holdings do not include investments that are held through BDCs.
5. Other includes pooled investment vehicles which are diversified across sectors.
6. The performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data shown above. Investment return and principal value will fluctuate, so that shares, when sold, may be worth more or less than their original cost. The Fund’s performance is net of certain fees and expenses. See the Fund’s prospectus for a comprehensive explanation of the Fund’s fees and expenses. The returns reflect any expense limitation and reimbursement agreement in place at the time, without which, the performance in certain periods would have been lower or higher. The Fund’s performance, especially for short periods of time, should not be the sole factor in making your investment decision.
7. The Morningstar/LSTA U.S. Leveraged Loan index is designed to deliver comprehensive, precise coverage of the US leveraged loan market. Underpinned by Pitch Book and LCD data, the Index serves as the market standard for the US leveraged loan asset class and tracks the performance of more than 1,400 USD denominated loans.
8. Beginning after two full quarters upon commencement of operations as an interval fund, the Fund expects to make quarterly offers to repurchase at least 5% of its outstanding Shares at the Fund’s net asset value (“NAV”). There is no guarantee an investor will be able to sell all common shares desired during the quarterly repurchase offer.
9. Total Annual Fund Expenses are per the Fund’s current prospectus include acquired fund fees and expenses which are borne indirectly by Shareholders. As of the most recent Prospectus dated July 10, 2025, the total annual fund expense ratio, gross of any fee waivers or expense reimbursements, for Class I shares is 1.94%, 2.09% for Class D shares, and 2.69% for Class A shares. See the Prospectus for more information. There is no guarantee that any investment will achieve its objectives, generate profits or avoid losses. Diversification does not ensure profit or protect against loss in a positive or declining market.

GLOSSARY

First Lien

First Lien credits hold the highest priority claim on the borrower’s collateral. In the event of default or bankruptcy First Lien creditors have the right to recover proceeds before other creditors and equity holders.

Portfolio Yield

Portfolio Yield represents the weighted average expected return of each loan within the portfolio. It is calculated as the loan’s annual interest rate (SOFR + Spread), plus any discount received or premium paid on the loan over a three-year period.

Leverage

Leverage is calculated by dividing a company’s net debt, at iDPC’s tranche level, by its EBITDA. A weighted average is calculated across investments to arrive at the Fund’s Leverage.

LTV

LTV is calculated by dividing a company’s net debt, at iDPC’s tranche level, by its enterprise value. A weighted average is calculated across investments to arrive at the Fund’s LTV.

Maintenance Covenant

A Maintenance Covenant is an agreement between a borrower and creditor that requires a borrower to maintain certain financial ratios over the life of the loan. A breach of the Maintenance Covenant is a violation of the credit agreement resulting in a technical default on the loan.

RISKS ASSOCIATED WITH AN INVESTMENT IN THE FUND

The discussion of the various risks associated with the Fund and the Shares (as defined and described in the Fund's Prospectus) are not intended to be a complete enumeration or explanation of the risks involved in an investment in the Fund. The Fund should be considered a speculative investment and involves a high degree of risk and may involve loss of capital, up to the entire amount of a shareholder's investment.

The Fund's performance depends upon the Adviser's selection of Investment Interests, the allocation of offering proceeds thereto and the performance of the Investment Interests. The Investment Interests' investment activities involve the risks associated with private credit investments generally. Risks include adverse changes in national or international economic conditions, adverse local market conditions, the financial conditions of Investment Interests, changes in the availability or terms of financing, changes in interest rates, exchange rates, corporate tax rates and other operating expenses, epidemics, pandemics, governmental responses to epidemics and pandemics, environmental laws and regulations, and other governmental rules and fiscal policies, energy prices, changes in the relative popularity of certain industries or the availability of purchasers to acquire companies, and dependence on cash flow, as well as acts of God, uninsurable losses, war, terrorism, earthquakes, hurricanes or floods and other factors including environmental negligence which are beyond the control of the Fund or the Investment Interests. Unexpected volatility or lack of liquidity, such as the general market conditions that had prevailed in 2008, could impair the Fund's profitability or result in its suffering losses.

The Fund invests in private middle-market credit instruments, including direct lending investments (including first lien and unitranche loans and, to a lesser extent, second lien loans and mezzanine debt) sourced by Audax Management Company (NY), LLC or an affiliate, Bain Capital Credit, LP or an affiliate, or Charlesbank Capital Partners, LLC or an affiliate (collectively, the "Core Managers"), and to a lesser extent business development companies, private credit funds, and the debt and equity tranches of collateralized loan obligations that are sponsored or managed by the Core Managers.

Other risks include, but are not limited to, market risk, concentration risk, and potentially less diversification due to the substantial portion of Fund assets invested in manager specific private credit. The Fund is also subject to the risks of leverage, higher fees and additional layers of expenses, as well as the potential for greater volatility due to Fund assets invested in a limited number of BDCs.

Many of the Fund's mezzanine investments (if any) are expected to be unsecured and made in companies whose capital structures have significant indebtedness ranking ahead of the investments, all or a significant portion of which may be secured. While the investments may benefit from the same or similar financial and other covenants as those enjoyed by the indebtedness ranking ahead of the investments and may benefit from cross-default provisions and security over the issuer's assets, some or all of such terms may not be part of particular investments. Moreover, the ability of the Fund to influence an issuer's affairs, especially during periods of financial distress or following an insolvency, is likely to be substantially less than that of senior creditors. Mezzanine investments generally are subject to various risks, including, without limitation: (i) a subsequent characterization of an investment as a "fraudulent conveyance"; (ii) the recovery as a "preference" of liens perfected or payments made on account of a debt in the 90 days before a bankruptcy filing; (iii) equitable subordination claims by other creditors; (iv) so-called "lender liability" claims by the issuer of the obligations; and (v) environmental liabilities that may arise with respect to collateral securing the obligations.
